Aus

I enclose \$10 check for renewal to "Arcadian". I will let the double subscription drop as it causes so much confusion.

I am getting discouraged with that Bally outfit. If it wasn't for your great newsletter, I would have thrown my Bally unit out long ago. Bally doesn't seem to be interested in providing software. Maybe its time we all starting looking for a computer as good as Bally's from a more reliable company. Atari 800 sounds promising. I have checked into TRS 80, apple II, Pet, Compucolor II, etc but can't get the quality sound, color, or fun as the Bally. Too much business designed.

I have received programs from everyone you plugged in your

newsletter. Mostly all very good.  
Only one complaint: Dave Stocker's  
is absolutely unreadable (handwriting).  
He must be a doctor.

Keep up the good newsletter, the  
good programs, AND the corrections.  
We would all be stranded high & dry  
without you.

a fading Bally buff

your survey

1. yes, even \$1,500
2. yes
3. yes and more

model # BA 1000-2 (Montgomery Ward)

serial # 8207

I asked you a question when I donated a \$5 check for your postage kitty (cached) which went unanswered: Do you know of any other Bally newsletters in the country? (6-3-79)

Jim Hays said the response from Michigan to his add in your newsletter was overwhelming. Strange! What makes their interest so much higher?
